Skilled in Laravel MVC, React, Tailwind CSS, custom WordPress development, SQL databases, SEO, performance optimization, hosting, domains, and production deployment support across healthcare, finance, travel, wellness, ecommerce, and international business domains.

CORE TECHNICAL SKILLS

Languages & Frontend: PHP, JavaScript, React JS, jQuery, HTML5, CSS3, Tailwind CSS

CMS & Ecommerce: WordPress custom themes, child themes, custom plugins, ACF Pro, WooCommerce

Delivery & Tools: Git, GitHub, cPanel, FTP, DNS, hosting support, responsive design, cross-browser QA

Backend & Frameworks: Laravel MVC, REST APIs, PHP application architecture

Databases: MySQL, SQLite, PostgreSQL, SQL queries, normalization, backup/restore, user permissions

Optimization: SEO, caching, minification, image optimization, mobile-first UI, performance improvements

PROFESSIONAL EXPERIENCE

WordPress and Web Developer

2021 - 2024

Kodegurus Pvt. Ltd.

- Delivered and maintained responsive business websites for clients across healthcare, finance, travel, wellness, printing, fitness, agriculture, ecommerce, and international business domains.
- Developed custom WordPress themes, child themes, reusable content sections, and ACF Pro field groups for flexible page editing and maintainable site updates.
- Configured and customized WooCommerce stores, product pages, checkout flows, and business-specific ecommerce requirements.
- Optimized production websites through caching, minification, image compression, SEO implementation, responsive front-end refinements, and cross-browser testing.
- Managed deployment support across cPanel, FTP, domains, DNS setup, production content updates, bug fixes, and mobile-first quality checks.
- Translated client requirements into maintainable website structures, launch-ready pages, and ongoing support workflows.

Representative live work: kodegurus.com, printerstechy.com, 800creditnow.com, credencemedicure.com, portal.credencemedicure.com, drharishsharma.com, dietitiashreya.com, fitnessloungegym.com, maximweigh.com, dawnfinancial.in, bajajtravel.com, farmdirect.org.in, xibiti.com, unimartinternational.com, chefscorner.hu.

CERTIFICATION

Fundamentals of Artificial Intelligence

Wadhwani Foundation | Certificate of Completion - Basic | May 01, 2026 | 7.5 hours

Completed foundational AI training covering core concepts, applied learning, and practical AI awareness while continuing to build a certification portfolio across AI, full-stack development, databases, cloud hosting, and product engineering.

BALVIR KAINTH

Selected Full Stack Projects and Technical Depth

rajeevkainth01@gmail.com Portfolio: melodious-nasturtium-d643ce.netlify.app GitHub: github.com/Balvir6200

SELECTED PROJECTS

DripBloc Pro - Premium Printing SaaS

GitHub: github.com/Balvir6200/dripbloc

- Engineered a premium multi-category printing platform using Laravel MVC, React, Tailwind CSS, and REST-style application architecture.
- Designed category-first data structure for print products, subcategories, sizes, templates, and design specifications.
- Built admin-side modules for category management, product configuration, and print workflow control.

Reader's Realm Library Management System

GitHub: github.com/Balvir6200/readers-realm-library-management

- Built a full-stack library management system using Laravel MVC, React, Tailwind CSS, SQLite, and MySQL.
- Implemented student records, subscription plans, payment tracking, auto-expiry logic, membership status tracking, and PDF receipt generation.
- Created a premium admin dashboard for library operations, subscription visibility, and financial activity monitoring.

Food Admin Dashboard

GitHub: github.com/Balvir6200/laravel-react-food-admin-dashboard

- Developed a restaurant operations dashboard using Laravel and React for Swiggy-style admin workflows.
- Created operational views for order management, customer records, payments, order status updates, and dashboard monitoring.

Lab SaaS System

- Developed SaaS-style diagnostic laboratory workflows including subscriptions, patient dashboard concepts, billing logic, and report handling.
- Structured database-driven modules for multi-tenant operations, report visibility, dashboard usability, and admin control.

DATABASE EXPERIENCE

- Designed and maintained PostgreSQL databases using PgAdmin for application-backed workflows.
- Created 10+ normalized tables following 1NF, 2NF, and 3NF principles.
- Wrote SQL queries for data retrieval, reporting, and operational checks.
- Managed user permissions and performed backup and restore operations.

EDUCATION

Bachelor of Technology

Punjab Technical University | 2013 - 2016
